Enviroseal™ Tuff & Tuff-IT.
Proven performance for Australian roofs

Durable protection that helps manage condensation and shield against harsh weather conditions

Key product benefits for homeowners

Condensation management
Helps reduce the risk of condensation build-up inside the roof space, protecting ceilings, insulation and timber framing from moisture damage.

Weather barrier protection
Acts as a secondary barrier against wind-driven rain and dust entering the roof space, helping maintain a healthier home environment.

Breathable design
Allows water vapour to escape while helping prevent water ingress, supporting long-term roof performance.

Bradford™ SAINT-GOBAIN | CSR

Built for installers

Ready for every roof

Why installers choose Enviroseal Tuff

- **Tough and reliable** - Designed to withstand handling and installation demands
- **Versatile application** - Suitable for use in Australian residential and commercial applications
- **Compatible under tile and metal roofs** - One solution across multipe roof types
- **Integrated tape option available** - Enviroseal Tuff-IT delivers faster sealing with no separate tape required

Product solutions to optimise building performance

Residential Applications

Combine Enviroseal Tuff with Bradford Gold ceiling and perimeter batts to create a high-performing roof system that helps improve thermal comfort and acoustic performance while providing enhanced protection against weather-related water ingress and condensation build-up. For improved roof ventilation and condensation management, consider incorporating Bradford roof vents and eave vents into the system.

Commercial Applications

Suitable for residential and commercial roofing applications, Enviroseal Tuff-IT offers all the benefits of Enviroseal Tuff with a factory-applied integrated tape that helps speed up installation and standardise lap sealing for a more consistent weather-resistant barrier.
