

Repair Panels

Gyprock Repair Panels are conveniently sized pieces of plasterboard used for repairing holes and other damage in plasterboard walls and ceilings. Repair panels are cut from Gyprock Plus 10mm plasterboard, making them lightweight, strong, easy to handle and extremely durable. Gyprock repair panels are available in two sizes including:

- **Repair Panel** – available as a 1200mm long by 900mm wide panel with the shorter edges recessed for flush jointing.
- **Mini Repair Panel** – available as a 530mm wide by 530mm long panel and ideal for smaller wall and ceiling repairs. These panels are suitable for use in 600mm x 600mm access frame kits.

Recommended Use

- Repairs of wall and ceiling applications that have no specific fire, acoustic or moisture resistance requirements.
- Reparation of holes and damage including dents and scrapes in residential projects.

Plasterboard Finishing

Jointing and finishing of Gyprock plasterboard interior installations is to be carried out in accordance with **FIGURE 1** and **TABLE 1** in this document, and the following details, so as to provide a smooth surface for decorating. Stopping and external corner beads are to be applied to all edges subject to damage. A Level 4 Finish is generally the accepted level of finish for residential construction as detailed in AS/NZS2589.1 and is also recommended for commercial construction. This requires a three-coat system, consisting of:

- Tape and tape coat
- Second coat and
- Finish (or topping) coat.
