Saving

CSR

Bradford SoundScreen™ is a high-density acoustic insulation that is specifically engineered for internal walls and the mid-floor in new homes. Including SoundScreen in the wall system will effectively reduce the transmission of noise between rooms, allowing you the peace and quiet you deserve.

Whether the internal wall is separating a bedroom from a toilet, living area from a study or laundry from a lounge room, filling a hollow wall with SoundScreen will effectively absorb enough sound power to reduce noise to an acceptable level.

Key Benefits

SUPERIOR ACOUSTIC COMFORT

Reduce unwanted noise transfers and sound transmission between rooms and mid-floors.

THERMAL PERFORMANCE

Improve indoor temperatures year-round for enhanced thermal comfort in home.

EASY TO INSTALL

High-density firm fitting batts for easy handling and cuttability.

PEACE OF MIND

Featuring a comprehensive 70 year warranty and backed by CSR – a leading Australian building company.

THE SECRET TO LOWER ITCH AND RIGID BATTS

Bradford SoundScreen™ wall insulation is now manufactured with our upgraded Comfort Touch™ Technology, delivering the same trusted performance homeowners know and rely on – with an even better installation experience.

The easiest and most cost-effective way to minimise sound transmission is to fill the hollow wall with high-density acoustic insulation.

Unwanted noise can be a problem in many common home situations

Adjoining kids’ bedrooms

Imagine settling your youngest into bed while there’s a galactic battle going on in the next room.

Media and entertainment rooms

Imagine doing some important planning while the big game is on the big screen in the next room.

Home offices and studies

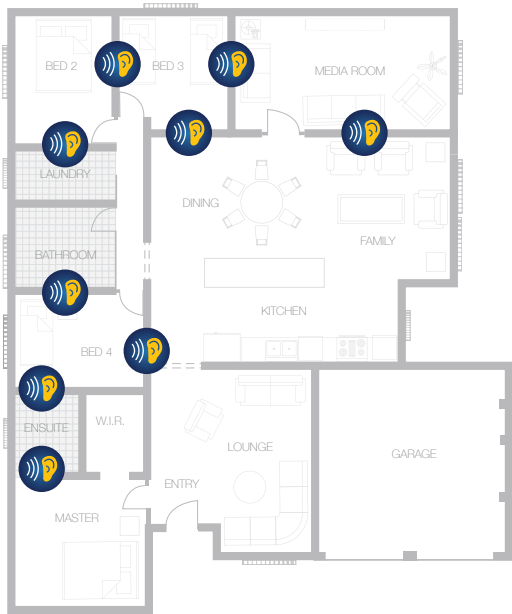

Imagine working from home in your new study while your little one is bashing out a tune in the next room.

Best areas for SoundScreen™

MID-FLOORS

One area often forgotten for sound insulation is between the floors of your home. SoundScreen included in the mid-floor of a two-storey home can effectively help to absorb the airborne elements of the noise. Additionally, the inclusion of isolating resilient mounts in the ceiling system will greatly reduce the transmission of impact noise.

BREATHE EASY

Many Australian families are concerned about the effects of our modern homes on allergy and asthma sufferers, particularly young children. Bradford is the only approved insulation partner of the National Asthma Council Australia's Sensitive Choice® program. Bradford SoundScreen™ insulation is suitable for use in the homes of asthma and allergy sufferers.

PERFORMANCE YOU CAN TRUST

Bradford SoundScreen™ insulation is manufactured under ISO 9001 Quality Systems and complies with AS/NZS 4859-1 'Materials for the Thermal Insulation of Buildings'. Bradford SoundScreen™ is non-combustible when tested to AS1530 part 1.

Established in 1934 and backed by CSR, Bradford Insulation is a leading manufacturer of premium energy-saving insulation products for residential, commercial and industrial applications,

Bradford SoundScreen™ insulation is independently certified to comply with AS/NZS 4859-1 by Global-Mark, and is backed by a 70 year product performance warranty.

The SoundScreen™ Range

R-VALUE (m²K/W)	THICKNESS (mm)	STANDARD SIZE (mm)	PIECES PER PACK	m² PER PACK	COVERAGE (m²)	MULTI PACK
TIMBER FRAME CONSTRUCTION
