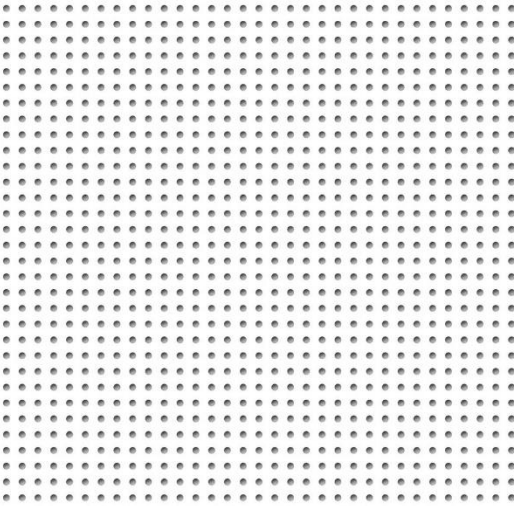
PRODUCT DATA SHEET

Rigitone™ Matrix 10mm Round

Rigitone Matrix 10mm Round is a perforated plasterboard that provides exceptional acoustic control and aesthetic impact with an edge-to-edge pattern layout, unique installation method and enhanced indoor air quality due to its Activ'Air technology. High levels of acoustic absorption are achieved through a combination of perforation patterns and a highly effective black acoustic fabric backing which also prevents dust from the ceiling entering the room and masks the ceiling framework. The availability of seamless access panels, ensures easy access to the ceiling cavity while maintaining pattern continuity. Rigitone Matrix 10mm Round features a pattern of 10mm round perforations spaced at 23mm centres, providing a 14.8% open area.



Recommended Use

- Non-fire rated ceiling and wall applications.
- Commercial construction.
- Applications where a high level of acoustic performance is required such as theatres, restaurants, shopping centres and hotel foyers.

Rigitone Matrix 10mm Round Specifications	
Feature	**Description**
Thickness	12.5mm
Mass	10.0kg/m²
Perforated Pattern	Matrix 10mm Round
Open Area	14.8%
Acoustic Fabric	Black
Widths	1196mm
Lengths	2000mm
Edge Profiles	Square Edge
Fire Hazard Properties[Δ]	Group No = 1 SMOGRARC ≤100m²/s²
Combustibility[◊]	Plasterboard may be used wherever a non-combustible material is required.

[Δ]In accordance with AS ISO 9705 and AS 5637.1

[◊]In accordance with NCC2022 Vol 1 Clause C2D10(6)(a) and NCC2019 Amdt1 Vol Clause C1.9(e)(i).

***This is a special order product. Lead time and minimum order quantities apply, please consult your account manager for details.**

Product Features

Acoustics

Absorbs sound into ceiling to prevent reverberation.

Aesthetics

Acoustic performance with design freedom

Activ'Air Technology

Uses Activ'Air technology for cleaner air

Square Edge

Square edge profile

International Alliance

Delivered through the International Alliance Program

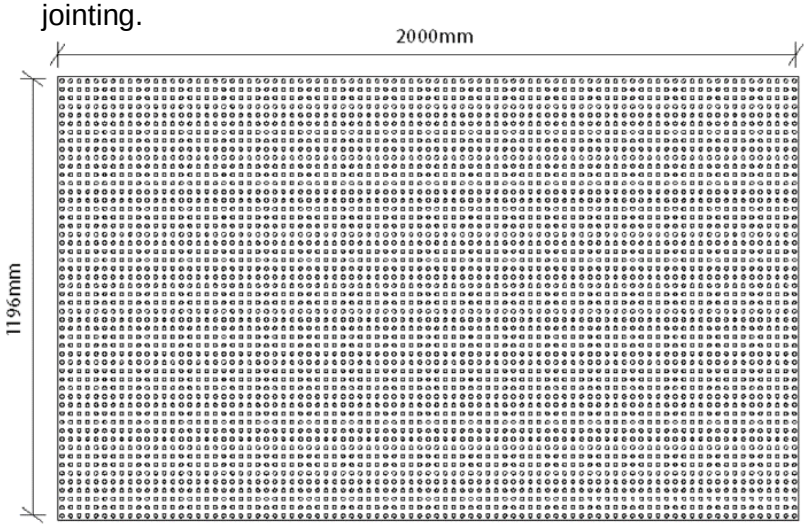
PRODUCT DATA SHEET

Rigitone Installation

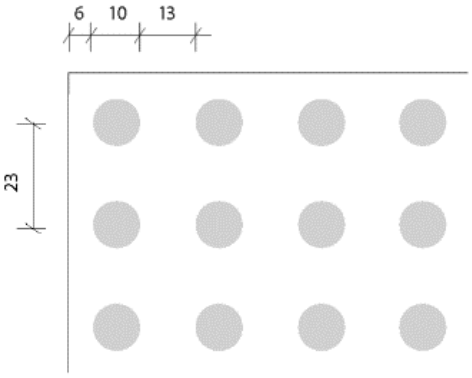
Rigitone is specially designed to be screw fixed to suspended ceilings. Its unique installation method allows the product's perforated pattern to continue undisrupted where sheets meet. Pattern spacers are available to ensure boards with square edges are fixed with the exact gap required for jointing. Boards with a chamfered edge are designed to be butted directly next to each other, and so do not require a pattern spacer. Unlike the traditional three coat plasterboard jointing systems, Rigitone boards are jointed by directing a specialised compound into a gap between the sheets. The filling method is made possible by the unique Rigitone Filler Accessory Kit, combined with the Rigitone Filler compound. While all four edges of the standard range of Rigitone boards are pre-primed, Rigitone primer is used to prepare cut edges for jointing.



Painting

After the joints are completed, the surface of the plasterboard is painted in accordance with the paint manufacturer's specifications using a paint roller, taking care to paint the surface only, and not the voids. Long nap and heavily loaded paint rollers should be avoided for this reason. Spray painting is NOT permitted as paint will impair the acoustic tissue thus degrading the acoustic properties. Water-based paints are required for boards that contain Activ'Air technology. Repainting will not impact the performance of Activ'Air.

Full installation and finishing details can be found in the Red Book 3: Commercial and Multi-Residential Installation Guide – Class 2-9 Buildings.



NRC Value Summary

Matrix 10mm Round 14.8% open area				Sound Absorption Coefficient					
Plenum (Air Cavity)	Plenum Insulation	αw	NRC	Octave Band Centre Frequencies (Hz)					
				125	250	500	1000	2000	4000
65mm	Empty	0.50	0.60	0.15	0.30	0.65	0.85	0.55	0.30
	50mm glasswool (14kg/m³)	0.60	0.65	0.35	0.55	0.75	0.70	0.60	0.45
200mm	Empty	0.50(LM)	0.65	0.35	0.70	0.85	0.60	0.50	0.35
	50mm glasswool (14kg/m³)	0.65(LM)	0.85	0.60	0.95	0.90	0.80	0.65	0.45
600mm	Empty	0.55 (L)	0.65	0.50	0.70	0.75	0.65	0.55	0.40
	50mm glasswool (14kg/m³)	0.70 (L)	0.85	0.65	0.90	0.90	0.85	0.70	0.55

Values are acoustic predictions by PKA Consulting. (L) denotes excess performance at 250Hz. (M) denotes excess performance at 500Hz, 1000Hz

PRODUCT DATA SHEET

Manufacturing Tolerances

Nominal Thickness	12.5mm +/- 0.3mm
Nominal Widths	1196mm +/- 3mm
Nominal Lengths	2000mm +/- 3mm
Squareness	90° +/- 1.5mm at 1200mm (short end)

**Subject to reasonable manufacturing tolerance.

Product Manufacture

Rigitone Matrix 10mm Round is manufactured for CSR Gyprock by worldwide plasterboard specialist Saint-Gobain

Access Panels

Rigitone Access Panels are designed to match the perforation patterns of the individual boards with minimal visible interruption of the pattern. **Refer to TABLE 1.** Access Panels for Matrix 8mm Round, Matrix 12mm Square and Astral include a perforated panel infill to match the sheet pattern when the cut-out is located between rows of perforations. Rigitone Galaxy Access Panels require a cut-out piece to be attached, sourced from the fixed sheet to ensure the pattern continues undisturbed. A minimum plenum depth of 140mm is required to insert the Access Panel from the finished side.

TABLE 1: Matching Access Panels and Pattern Spacers for Rigitone Perforated Plasterboard

Storage

Protect plasterboard from weather and moisture. Avoid products sagging by storing horizontally, supported on a level platform or full-width support members spaced at max. 600mm centres.

Health and Safety
