1 Scope

This procedure sets out the process to be followed when notifying Authorities and/or the local community of a pollution incident that will cause or threaten to cause material harm to the environment or human health, and outlines how the risk of harm will be reduced.

This procedure is for all of CSR's NSW EPA Licenced sites for CSR Building Products Limited and is in line with the sites' Pollution Incident Response Management Plan (PIRMP).

2 Plan Activation

In the event of an incident, the sites' PIRMP (or Emergency Response plan for unlicensed sites) process for incident assessment is initiated. The incident must be assessed using CSR's Risk Matrix to determine if it has caused, or threatens to cause, material harm to the environment.

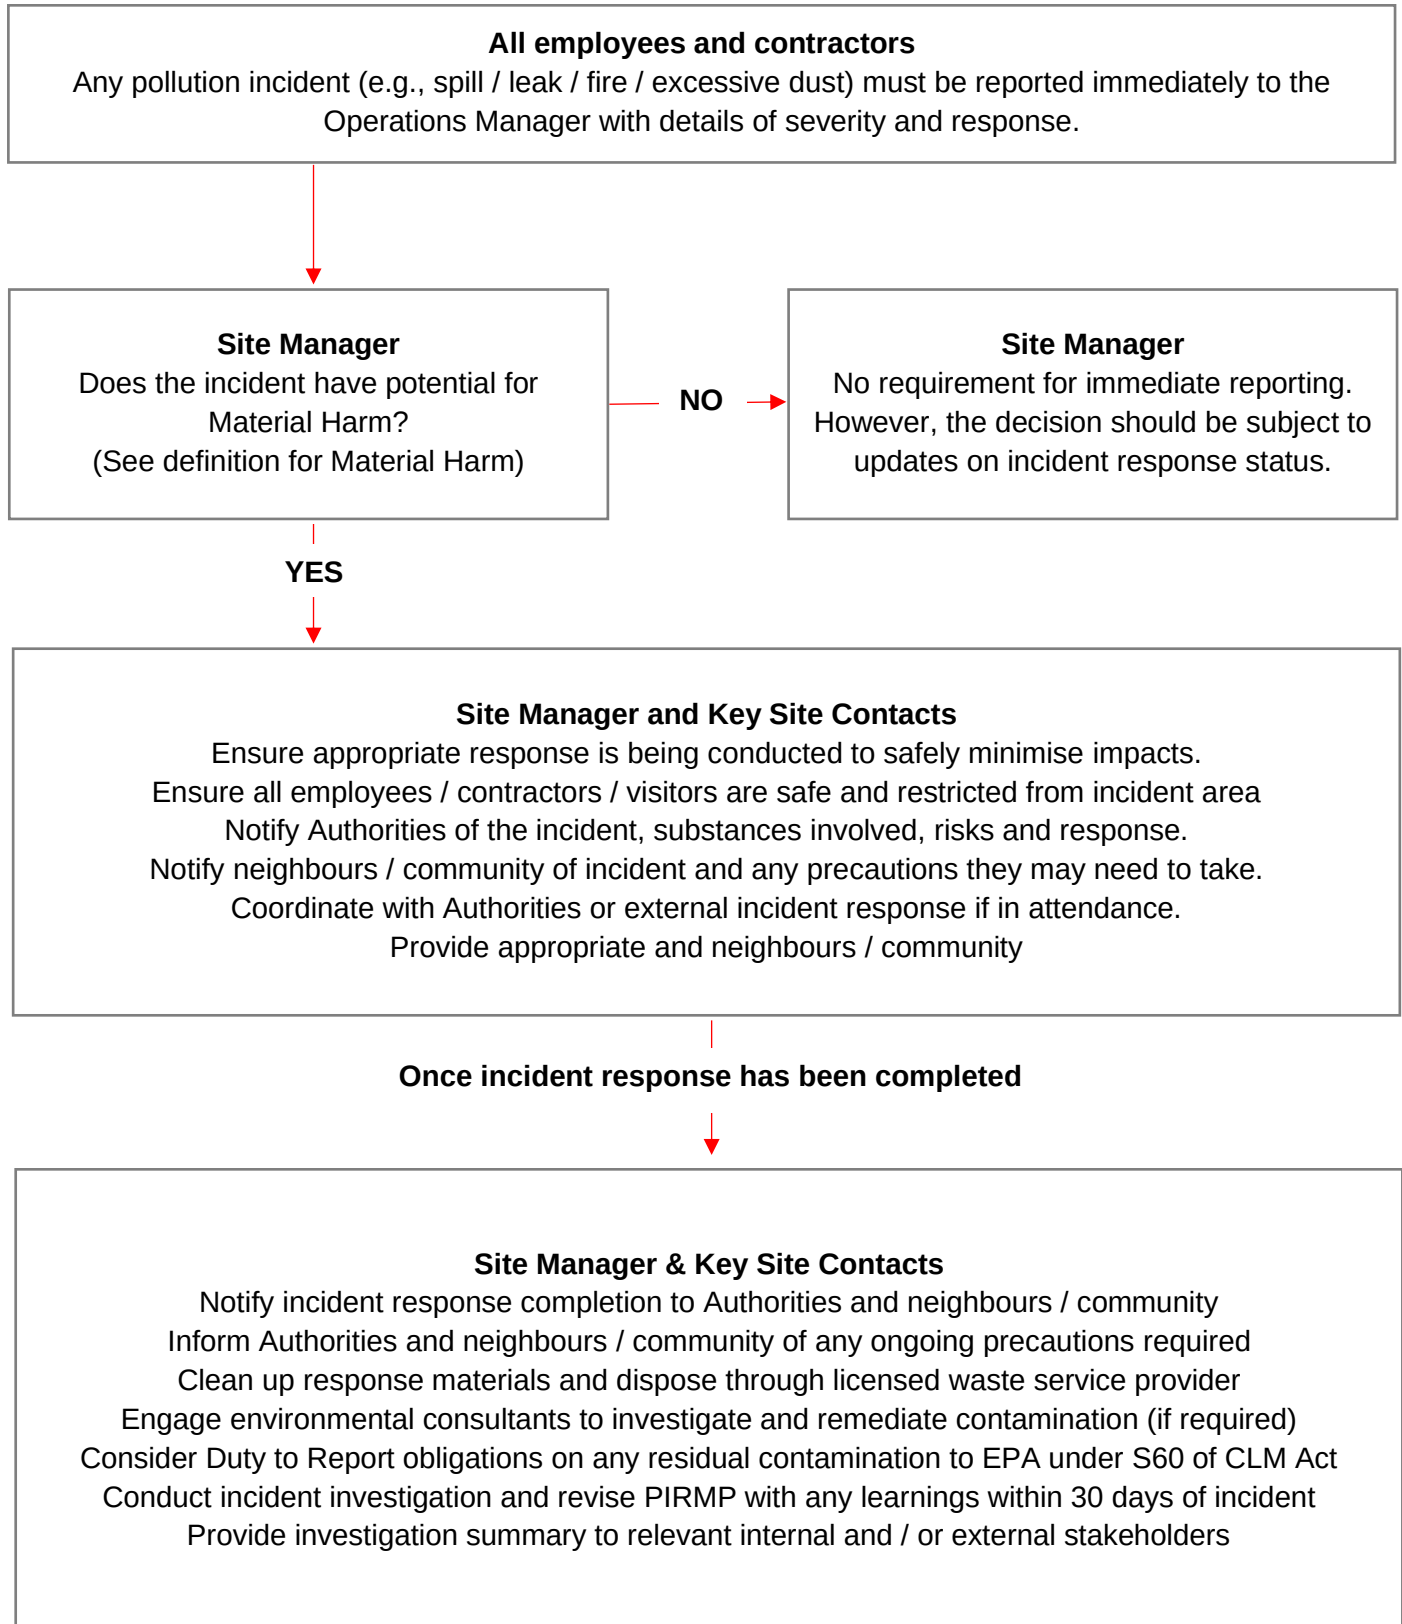

If a pollution incident occurs in the course of an activity so that material harm to the environment is caused or threatened, the site must **immediately** implement this plan.

It does not matter that harm to the environment is caused only in the premises where the pollution incident occurs.

Incidents will be managed in accordance with CSR's relevant procedures and plans. Each site PIRMP outlines detailed actions to be undertaken in the event of an incident.

3 PIRMP Activation Procedure – Immediate Response

4 Notification Obligations

There are a series of immediate notifications that must be made. In the first instance, notify the CSR internal management team as specified in the sites PIRMP (or Emergency Response plan for unlicensed sites). Secondly, commence verbal (telephone) notification to external authorities.

Table below outlines the local council and public health unit contact details.

24 hour contact				
				Contact Number
Police, Fire Brigade, Ambulance				000
EPA – Environment Line				131 555
SafeWork NSW				131 050
Fire and Rescue NSW				1300 729 579
Relevant local council and public health unit contact				
CSR Site	EPA Licence Number	Location	Local Authority/ Council	Public Health Unit
Bradford Ingleburn	13087	55 Stennett Road, Ingleburn, 2565	Campbelltown City Council http://www.campbelltown.nsw.gov.au/ General Contact 02 4645 4000 Pollution Issues: 02 4645 4604	Eastern Zone (Camperdown Office)
				Contact Details
				PO Box 374, Camperdown 2050 Ph: 02 9515 9440 and ask for the Environmental Health Officer
				AH Ph: 02 9515 6111 (Royal Prince Alfred Hospital) or Ph 02 9828 3000 (Liverpool Hospital) – ask for the Public Health Officer
Hebel Somersby	3427	112 Wisemans Ferry Road, Somersby, 2250	Central Coast Council http://www.centralcoast.nsw.gov.au General Contact and Urgent pollution issues 02 4306 7900	Gosford Office PO Box 361, Gosford 2250 Ph: 02 4349 4845 ask for the Public Health Section
				Gosford Hospital Ph: 02 4320 211 ask for the Public Health Section
Wetherill Park	457	376 Victoria Street, Wetherill Park, 2164	Fairfield City Council http://www.fairfieldcity.nsw.gov.au General Contact & Pollution Issues 02 9725 0222	Eastern Zone (Camperdown Office) PO Box 374, Camperdown 2050 Ph: 02 9515 9440
				AH Ph: 02 9515 611 (Royal Prince Alfred Hospital) or Ph: 02 9828 3000 (Liverpool Hospital) – ask for the Public Health Officer

If new information becomes available the site will update the relevant external authorities. This includes:

- The nature, the estimated quantity or volume and the concentration of any pollutants involved;
- The circumstances in which the incident occurred (including the cause of the incident, if known);
- The actions taken or proposed to be taken to deal with the incident, any resulting pollution or threatened pollution.

5 Surrounding Area Notification Process

Sites will rely on letter box drops to provide early warnings and regular updates to all premises within a 500m radius of the site (as a general rule) of any potential harm from a pollution incident. The decision to provide early warnings will be made between the Site Manager (or their delegate) and Group Sustainability.

1. When determining who is notified, Site Managers will consult their PIRMP's.
2. In determining the extent of community notification for potential air emissions, the Site Manager will consider aspects such as the type of pollutant, prevailing winds, height and magnitude of an emission, as well as the location of any on-site fallout or off-site impacts, the likelihood of the pollutant reaching ground level, and possible impacts on sensitive receptors as identified in their PIRMP.

The content of any letter box drop will be subject to approval from Group Sustainability and the CSR Communications Team. All statements must be reviewed and approved by CSR's head office and CSR Legal before distribution.

6 Key PIRMP Definitions

The following definition provide an understanding of three (3) key terms that the EPA generally reference in relation to when a PIRMP is to be activated:

Pollution Incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise.

Material Harm to the environment is when:

It involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Immediately Reporting simply means promptly and without delay. The amount of time this takes is likely to change depending on the circumstances of the incident.
