

# Warm Greys

Warm Greys combines tactile, architectural materials to create a look that feels refined, understated, and enduring. Textured concrete, smooth render, and brushed metal finishes are layered with warm timber accents to soften the geometric form and add depth.

## Layered materiality

Combine concrete, render, brick and timber with subtle texture for warmth and depth.

Stainless steel  
wall light

## Subtle highlights

Use silvery highlights and tonal shifts to add dimension while keeping a refined grey palette.

## Warm grey undertones

Layer soft silver and dove greys with warm cream or blush undertones for an inviting exterior.
