

Warm Whites

This is a flexible scheme that focuses on layered warm whites and mixed materiality, creating an open and breezy look by letting the architecture take centre stage. Embrace a mixed material facade, as layering textures will create depth and interest to an all-whites palette.

Warm undertones

Painting over terracotta bricks can bring a warm undertone to a crisp white finish.

Pale eucalyptus outdoor seating

Subtle colour layering

Add dusty eucalyptus, butter yellow or sandy accents to soften an all-white scheme.

Contrasting finishes

Pair high-gloss with low-sheen or weathered finishes to create subtle visual interest.
